unterm durchschnitt is a record label. part of the problem since 1999. we try to uplift subversively popculture beyond the borders of nations and origin. since we are subjected under capitalist conditions as everybody else we refuse to call ourselves independent or diy. it's a myth that dreams of indie-feelings lead to a emancipated society in which the capitalist system is eventually shut down, because this hallucinated freedom can only be a small free space which is in fact provided by the system itself.
